Executive Summary

VP & Digital Engineering Leader with **21+ years of experience delivering large-scale AI-driven and cloud-native transformations across Digital Lending, Personal Banking, Mutual Funds, and Payment Automation in highly regulated BFSI environments** and **CBS integration with TCS BaNCS/Finacle**. Proven track record of defining and governing enterprise-wide **digital and AI architectures**, aligning technology with business strategy, and driving measurable outcomes in cost, risk, speed, and customer experience.

Led and scaled cloud migration practice including migration factory setup, reusable frameworks, accelerators, and multi-squad execution across enterprise programs. Led enterprise IT operations aligned with architecture strategy, covering cloud infrastructure, SRE practices, ITSM frameworks, and SLA-driven service delivery for mission-critical BFSI platforms. Led architecture and platform strategy for payment systems, fraud detection, and real-time transaction processing platforms, enterprise-scale Financial Crime & Compliance modernization (KYC, AML, Sanctions, TM), integrating with Actimize, Fenergo, CKYC, Aadhaar APIs, World-Check, Dow Jones, FIU-IND, achieving audit-ready, SLA-driven, and regulator-aligned platforms. Successfully delivered **AI-enabled straight-through processing with human-in-the-loop governance.**

Defined and governed end-to-end migration lifecycle (discovery, assessment, wave planning, execution, validation, cutover, optimization) ensuring predictable and low-risk migrations. Built reusable migration accelerators including assessment templates, automation scripts, migration runbooks, validation frameworks, and cost optimization dashboards. Defined post-migration hosting patterns using Kubernetes (AKS), containerization, autoscaling, and serverless architectures. Defined enterprise security architecture including Zero Trust, IAM (RBAC/ABAC), API security (OAuth2, mTLS), SIEM integration (log monitoring, threat detection), and secure SDLC with SAST/DAST and vulnerability management. Strong experience **in multi-tenant SaaS platforms, multi-cloud architectures (Azure, AWS, GCP), event-driven microservices, enterprise integration, and DevSecOps automation, ensuring scalability, resiliency, zero-trust security, and continuous compliance**.

Deep expertise in **AI/ML, GenAI, and intelligent automation**, including: AI-first underwriting, fraud detection, income stability, and credit risk scoring,GenAI-powered borrower assistance, document

understanding, and contract summarization, **Multi-Agent and Agentic AI–driven orchestration for KYC, AML, risk, fraud, and lending decision automation, RAG-based enterprise knowledge hubs for policy, regulatory, and operational intelligence.**

Experienced in **EA/AI governance, model risk management (MRM), LLMOps & MLOps**, including:Model lifecycle governance,Explainability & auditability,Bias, drift & hallucination controls.

Secure tool-calling & data isolation. Adept at CXO-level stakeholder engagement, regulatory interactions, and driving enterprise-wide capability mapping, roadmaps, and architectural governance. Proven leader of global Agile delivery across GCC/CoE models, managing complex vendor ecosystems and distributed engineering teams.

Recognized as a strategic AI-first Digital Architecture & Transformation Leader who balances innovation, compliance, and execution at scale—delivering platforms that are secure, intelligent, composable, and business-outcome focused.

Thought Leadership & Certifications

- Authored **technical blogs, architecture blueprints, and BFSI case studies** on enterprise modernization and AI integration.
- Focus areas: **Azure cloud-native transformation, DevSecOps automation, and BFSI-specific GenAI** solutions.
- Online portfolio and consulting presence: ananndnerurkar.wixsite.com/website
- **TOGAF 9 | AWS Certified Solution Architect | GCP Professional Architect| Sun Certified Enterprise Architect** | Scrum Master | Product Owner

Career Highlights

- Defined **enterprise modernization strategy and target-state architecture** for banking, lending, and compliance platforms — aligning technology vision with business objectives and regulatory mandates.
- Partnered **with CxOs, Compliance Heads, and Product Owners** to translate **strategic priorities into actionable, scalable architecture roadmaps.**
- Led **portfolio rationalization of 400+ legacy applications** across business domains, leveraging **Gartner's TIME quadrant and 6R strategy** to define modernization priorities and drive multi-year technology roadmap aligned with enterprise transformation goals.
- Modernized **legacy lending, mutual fund platform, payment automation and banking** platform into microservices using DDD principles, reducing **release cycles from 8 weeks to 2 weeks** and achieving **30% cost savings** via cloud optimization, Defined microservice orchestration patterns using Kafka Streams and DAPR for stateless workflow execution.
- Integrated **AI/ML and GenAI capabilities** (LangChain, Spring AI, Guardrails AI) into core BFSI workflows for KYC, AML, document intelligence, and fraud detection.
- **Championed modernization of legacy applications into modular microservices and APIs** — improving agility, scalability, and cost efficiency by up to 40%.
- Architected and governed **multi-cloud modernization (Azure, AWS, GCP)** using cloud-native patterns, event-driven microservices, and container orchestration (AKS, Kubernetes).
- Integrated enterprise KYC/AML platforms with compliance solutions including **CKYC, Aadhaar APIs, FIU-IND reporting, ensuring alignment with AML/BSA and GDPR frameworks.**

- Architected microservices platforms (**150K+ concurrent users, 5K–8K TPS**) with auto-scaling, high availability, and fault tolerance on AWS, Azure, and GCP.
- Designed and **implemented DevSecOps pipelines** (Azure DevOps, GitHub Actions, Terraform, Vault) integrating SAST/DAST, container scanning, and policy gates — reduced vulnerabilities by 40%.
- Delivered **active-active cloud architecture** using Azure Front Door, Traffic Manager, and AKS — achieved 99.99% uptime for critical BFSI platforms.
- Established **enterprise architecture governance** — creating reusable blueprints, standards, and quality gates **under Federated EA governance models.**
- Ensured regulatory and security compliance (**AML, BSA, GDPR, ISO 27001, SOC2**) through embedded risk controls, audit alignment, and continuous architecture review.

Professional Summary

Enterprise Solutioning & Modernization

- Defined **enterprise solution architectures** across **Lending, Compliance, and Mutual Funds portfolios, aligned with EA roadmaps and regulatory requirements (RBI, SEBI, FIU-IND).**
- Led **solution reviews, design authority, and data flow validations** ensuring cross-platform integration across core banking, KYC, AML, and fraud systems.
- Established **architecture governance frameworks with reusable blueprints, capability maps, and standards** adopted across multiple programs.
- Proven track record in **modernization and digitization programs by defining end-to-end architecture strategies, aligning technology with business outcomes**, and enabling secure, scalable, and resilient platforms, **supporting 150K+ concurrent users and 5K–8K TPS,** incorporating auto-scaling, high availability, and fault tolerance using Kubernetes, API Gateways, and event-driven architecture.

Cloud Migration & Modernization Strategy

- Led **enterprise cloud migration programs** using 6R strategy (Rehost, Replatform, Refactor, etc.)
- Defined **migration factory model** including assessment templates, wave planning, and execution playbooks
- Designed **migration runbooks, rollback strategies, and validation frameworks**
- Built **automation accelerators for migration and environment provisioning**
- Delivered **large-scale migration of legacy systems to cloud-native architectures**

Enterprise Architecture Governance & Strategy:

- Led Architecture Review Boards (ARB) across multi-domain banking programs
- Defined enterprise reference architecture and standards
- Built business capability maps aligned to RBI-regulated domains
- Owned build-vs-buy strategy for core banking and compliance platforms
- Conducted cost-benefit & TCO analysis for cloud vs COTS modernization

RegTech & Compliance

- Architected and delivered **KYC/CDD/EDD modernization platforms integrating Fenergo, CKYC, Aadhaar eKYC, PAN validation, and AML & Financial Crime transaction monitoring with Actimize.**
- Implemented outbox eventing, correlationId, idempotency handling **to ensure reliable and auditable event-driven flows across onboarding and fraud detection journeys.**
- Enabled **RegTech automation with FIU-IND reporting, AML screening (sanctions/PEP), and fraud scoring engines, reducing manual reviews by 40%.**

Enterprise Presales, Vendor Evaluation & Platform Selection

- **Led enterprise-scale solutioning, presales, and vendor evaluation initiatives across both sell-side (system integrator) and buy-side (captive BFSI) environments.**
    - **Supported strategic enterprise deals (USD 10M–50M+), contributing across the end-to-end deal lifecycle from discovery and solutioning to proposal defense and closure.**
- **On the sell-side (Genpact / Infosys):**
    - **Drove end-to-end enterprise solutioning and presales for large transformation programs.**
    - **Defined target-state architectures, integration strategies, security models, and operating models.**
    - **Led solution workshops, architecture walkthroughs, and proposal defenses with CXO and client leadership.**
- **On the buy-side (BNY Mellon – Captive):**
    - **Owned architecture-led RFP and vendor evaluation frameworks for large digital and platform modernization programs.**
    - **Defined functional, non-functional, security, integration, and scalability criteria for vendor assessments.**
    - **Evaluated vendor proposals and solution architectures against enterprise standards and target-state blueprints.**
    - **Facilitated Architecture Review Boards (ARB) and cross-functional decision forums with business, risk, security, and procurement teams.**
    - **Supported build-vs-buy decisions and final vendor selection aligned with long-term platform strategy.**
    - **Acted as a bridge between business, architecture, and delivery, ensuring selected solutions were implementable, secure, scalable, and future-ready.**

DevOps, DevSecOps & SRE

- Led **end-to-end DevOps implementation** using **GitHub Actions, Jenkins, Terraform, Docker, Helm**, integrating **SAST/DAST, Snyk, Trivy, Vault, SonarQube** for secure pipelines.
- Ensured compliance with **ISO 27001, SOC 2, PCI DSS, and Zero Trust frameworks**.
- Mentored teams to adopt **Digitization, DevSecOps, and SRE best practices** across India and global delivery centers.

GenAI & Advanced Tech

- Delivered **GenAI-based solutions** including **LLM-powered chatbots, document intelligence, recommendation engines, and fraud detection, banking advisor** using **LangChain, OpenAI APIs, Spring AI and Python**, integrated with **Spring Boot microservices** via secure API contracts.

Leadership & Program Delivery

- Proven ability to **translate vision into actionable architecture and engineering outcomes** across **cross-functional global teams**, define **technology roadmaps** and optimize budgets delivering measurable **30 % cost savings.**
- Partnered with **product owners and squad leads to deliver banking modernization in Agile-SCRUM model**, ensuring architectural integrity while enabling fast delivery.
- Delivered **full program lifecycle** from **architecture to production** with ownership of **planning, estimation, vendor management, and cost optimization**.
- Achieved **30% faster deployments, 20% improved performance, and 40% vulnerability reduction**, while maintaining **hands-on involvement** in coding, cloud provisioning, debugging, and security hardening.
- Coordinated **multi-squad delivery across Digital Lending, RegTech, and Mutual Funds modernization**, managing dependencies and architectural risks**.**
- Drove **continuous compliance alignment, embedding risk controls and audit** trails into the delivery lifecycle.

Stakeholder & Regulatory Engagement

- Worked directly with **senior leadership, compliance officers, and regulators** to align solution architectures with business, audit, and compliance objectives.
- Translated **regulatory mandates into actionable technical controls** (PII encryption, tokenization, role-based access, immutable audit logs).
- **Presented enterprise architecture roadmaps to leadership**, gaining buy-in and securing delivery investment.

Core Competencies

- Architecture Design & Roadmaps | Cloud Native Design | TOGAF | Event-Driven Architecture
- Java 17 |Microservices | Spring Boot | Kafka | Angular | React | Fullstack Engineering
- DevOps & DevSecOps | GitOps | Terraform | Jenkins | Kubernetes | GitHub Actions
- Cloud Migration | Application Modernization | CI/CD | Performance Optimization
- Security & Compliance | Zero Trust | ISO 27001 | SOC 2 | PCI DSS
- EA Tools: Sparx EA, LeanIX, Prolaborate | Agile & Scaled Agile | RFPs, Presales, Strategy

Professional Experience

Enterprise Architecture, Cloud & AI Transformation Initiative

Independent Professional Initiative | Mumbai | Jul 2022 – Mar 2026

Architecture & Modernization

- **Explored modernization patterns for digital lending, mutual funds, and compliance platforms on cloud-native architectures**
- **Developed reference architectures for microservices-based BFSI systems (KYC, onboarding, lending workflows)**
- **Defined capability maps, user journeys, and architecture blueprints aligned with RBI/SEBI regulatory requirements**

Cloud & Event-Driven Systems

- **Designed event-driven architecture patterns using Kafka for real-time processing (fraud detection, onboarding, disbursement flows)**
- **Built microservices prototypes using Spring Boot, Kubernetes, and API-first integration patterns**
- **Evaluated multi-cloud strategies (Azure, AWS, GCP) for scalability, resilience, and cost optimization**

AI / GenAI / Agentic AI

- **Explored AI/GenAI use cases in BFSI including Banking Knowledge Hub, Lending Agreement Reviewer, Underwriter Copilot, document intelligence, fraud detection, and onboarding automation.**
- **Built Digital Lending with Agentic AI PoCs using LangChain, Spring AI, LangGraph, and Guardrails AI for agent-based orchestration**
- **Studied explainability techniques (SHAP, LIME) for transparent AI decisioning**

AI / GenAI Strategy & Platform Setup

- **Defined enterprise AI strategy frameworks aligning AI initiatives with lending, compliance, and customer experience use cases**
- **Designed AI/GenAI platform architectures including LLM integration, RAG-based knowledge systems, and agentic orchestration models**
- **Established LLMOps/MLOps approaches covering model lifecycle, deployment, monitoring, and governance.**

- **Defined AI governance frameworks including explainability, bias control, hallucination mitigation, and auditability**
- **Designed secure AI architecture patterns (data isolation, access control, prompt security, guardrails)**
- **Built reference architectures for integrating AI with enterprise systems (LOS/LMS, Core Banking, Data Platforms)**
- **Evaluated build vs buy strategy across hyperscaler AI services (Azure OpenAI, AWS Bedrock, GCP Vertex AI)**

DevSecOps & Platform Engineering

- **Implemented prototype CI/CD pipelines using GitHub Actions, Terraform, and Azure DevOps**
- **Applied secure design principles including OAuth2, API security, and SAST/DAST integration**

RegTech & Compliance

- **Modeled KYC/AML frameworks and regulatory workflows aligned with RBI/SEBI/PCI DSS**
- **Designed audit-ready architecture patterns with logging, traceability, and compliance controls**

Outcome

- **Built strong perspective on combining enterprise architecture, AI, and execution in regulated BFSI environments**
- **Developed reusable architecture blueprints for large-scale transformation programs**
- **Strengthened expertise in AI-led digital transformation and platform modernization**

Tech Stack: Java 17, Spring Boot 3.0, Kubernetes, Docker, Terraform, React, Kafka, GCP, Azure,Azure DevOps, GitHub Actions, Spring AI, LangGraph, LangChain, Guardrails AI, XAI- SHAP, LIME

VP -Technology | BNY Mellon | Pune | *Jul 2014 – Mar 2022*

Key Impact

- **Positioned BNY Mellon India GCC as a global delivery hub for Global Compliance Program (KYC/CDD/EDD/Credit & Fraud Score/AML/Financial Crime) Modernization, driving regulatory compliance, audit-readiness, and technology transformation with measurable business outcomes in risk reduction, faster onboarding, and improved customer experience.**

Architecture & Modernization

- Led **technology strategy, enterprise-wide capability maps, EA Blueprint and cloud native architecture** aligned with **strategic business KPIs, near real time integration** for digital lending, mutual fund platform, payment automation and global compliance program **(KYC/CDD/EDD with Fenergo**, **AML/Financial Crime with Actimize, Credit and Fraud risk Assessment with CIBIL Bureu/Experion Hunter & internal ML service , Screening Service with Refinitiv World-Check, Dow Jones Risk & Compliance for Sanctions, PEP ,Adverse Media feeds on GCP /AWS/Azure.**
- Portfolio Rationalization of 400**+ legacy applications** into **event-driven microservices platforms**, improving **performance by 20%** and **reducing batch windows by 50%** for real-time processing.
- Championed **Well-Architected Cloud Framework adoption** (security, performance, cost optimization, resiliency, operations) across lines of business, enabling **20–30% cost reduction** in cloud spends.
- Delivered **fraud detection and financial crime compliance solutions** leveraging **real-time analytics, machine learning, and GenAI-driven document processing** to reduce false positives and accelerate onboarding. Led **end-to-end modernization of legacy enterprise applications** (Java/J2EE/EJB, Oracle Forms, PL/SQL stored procedures and triggers) to **cloud-native microservices architecture** using **DDD principles and event-driven design (Kafka)** deployed on **Azure Cloud**.
- **Implemented low-code/no-code platforms**, including **OutSystems, Power Apps, and Camunda**, to accelerate **legacy application modernization**, automate workflows, and rapidly build UI/CRUD interfaces while integrating with microservices APIs.
- Designed and executed **API-driven integrations and COTS solutions** to ensure seamless interoperability between modernized services and existing enterprise systems.
- Enabled **AI/ML-ready architecture** for automation, predictive analytics, and intelligent decision-making across BFSI platforms.
- Mentored teams on **low-code/no-code adoption, Camunda workflow automation, microservices best practices, and cloud architecture**, improving development efficiency and delivery quality.
- Conducted **architecture workshops** with business leaders and CTO office to define **target-state digital strategy and modernization roadmap**.
- Formulated **EA Governance**, **architecture principles, reference models, and standards** driving consistency across modernization programs.
- Defined **cloud-native architecture** using **Domain-Driven Design, microservices (Spring Boot, Spring Cloud, Kafka, Kubernetes, Istio, API Gateway)** on **Azure and GCP** with automated scaling, **zero downtime deployments**, and observability.

Leadership & Delivery

- Directed **enterprise-scale modernization programs** across **Digital Lending, Mutual Funds, Personal Banking, and Payment Automation**, ensuring security, scalability, resiliency, and ensuring compliance & regulatory mandate **GDPR, SOX**, **FATCA**.
- Led global compliance technology initiatives, delivering **AML/KYC modernization** with integrations into **Fenergo, CKYC, Aadhaar APIs, AML/Financial Crime transaction monitoring with Actimize , Screening with Refinitiv World-Check, Dow Jones Risk & Compliance for Sanctions, PEP ,Adverse Media feeds, and FIU-IND systems**.

- **Led global delivery** across **multi-location teams (US/EMEA/India)** with a **CoE model**, managing 60 **+ FTEs across 5 Agile-SCRUM squads**; drove engineering excellence, predictable delivery, and SLA adherence.
- Partnered with **CXOs, compliance heads, and regulators** to align technology roadmaps with **business outcomes, risk controls, and regulatory mandates**.
- **Mentored senior architects and engineering managers**, building a pipeline of future leaders while institutionalizing **standards, design blueprints, and capability maps**.
- Achieved **95% sprint predictability** and **25% cycle time reduction** through coaching and process optimization.
- Provided **executive-level thought leadership** on platform scalability, resilience, and modernization to **CTO office and architecture council**.
- Actively led **design reviews, PoCs, production cutovers** with **hands-on ownership** across SDLC; presented outcomes to **C-suite and board**.

Azure & Hybrid Cloud Solutions

- Designed and deployed **Azure-based solutions** leveraging **AKS, API Management, Cosmos DB, Key Vault, and Blob Storage** for client data integrations in **Wealth Management**.

GenAI & Advanced Tech

- Delivered **GenAI-powered solutions** for Wealth and AST domains using **Azure OpenAI, LangChain, Python** (portfolio assistants, document intelligence, chatbots).
- Applied **AI-driven insights** for portfolio analysis and internal productivity, integrated into **Spring Boot microservices**.

DevOps, DevSecOps & SRE

- Built **DevOps pipelines** using **GitHub Actions, Jenkins, Terraform, Helm, Docker, Argo CD** enabling **infrastructure automation and accelerated release cycles**.
- Established **DevSecOps practices** (SAST, DAST, container image scanning, secret detection) ensuring **ISO 27001, NIST, SOC 2, Zero Trust** compliance.
- Defined and implemented **SRE models** with **SLAs, SLOs, service health monitoring, and automated incident response** via **Prometheus, Grafana, ELK, PagerDuty**.

Tech Stack: Java 17, Spring Boot, Angular, React, Kafka, Flink, Camunda 8, Oracle, Istio, Kubernetes, Azure & GCP DevSecOps, Scaled Agile, Jira, Jira Advanced.

Solution Architect|Genpact| Gurgaon | *Jun 2012 – Jan 2014*

- Led legacy modernization and SOA architecture for large insurance and BFSI clients using Java, Spring, and Oracle stacks.
- Created solution blueprints for policy admin and claims systems, aligning with NFRs and long-term IT strategy.
- Supported RFPs and technology evaluations, driving architecture planning, vendor assessments, and integration design.

- Delivered SOA-based integrations using Web Services and middleware platforms (MQ, WebSphere) for reconciliation and settlements.
- Collaborated with onsite stakeholders in US and UK for requirements, UAT, and implementation

Tech Stack: Spring, Webservices, oracle, WebSphere, EJB, Jenkins

---

Technical Architect | Infosys | Pune | *Aug 2010 – May 2011*

- Architected modernization roadmap for a European investment banking client.
- Re-engineered SOA platform into modular services using Spring, REST APIs, and Oracle backend.
- Delivered full project lifecycle from architecture to implementation and deployment.

Tech Stack: Java, Spring, Oracle, REST APIs, Jenkins, Maven, JIRA, Scrum

---

Project Lead |EDS | Pune | *May 2009 – July 2010*

Sr Dev Lead |**ACI Payment |** Pune | *Jan 2004 – March 2009*

Developer | Apar Technologies | Mumbai | *May 2003 – Jan 2004*

Developer | Halo Technologies | Mumbai | *Sept 2001 – Jan 2003*

Developer | Alpha Computers | Mumbai | *Jan 2000 – Aug 2001*

Industry Verticals

- BFSI: Retail |Corporate Banking | Mutual Fund | Loans | AST |AIS |Payment |Treasury |Wealth Management |Fintech | Regtech | Digital Lending
- Insurance: Life | Property | Auto | Claims
